

## TAKE PART IN

### UNTIL FEBRUARY 27, 2022 - THE EXHIBITION "UNCERTAINTY" CONTINUES

The exhibition curated by INFN "Uncertainty. Interpreting the present, predicting the future" continues at the Palazzo delle Esposizioni in Rome. The exhibition, dedicated to the theme of uncertainty and how science has learned to understand and "manage" it, is part of the wider Palaexpo special project "Three Stations for Art and Science", promoted by Roma Culture, which includes the exhibitions "La Scienza di Roma" and "Ti con Zero". The exhibitions are enriched by a program of collateral public events, the complete calendar of which is available on the [Palazzo delle Esposizioni website](#). ■
